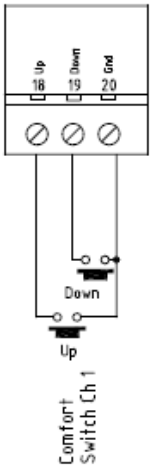
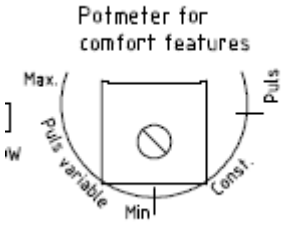
Security:	N/A
Mounting:	Surface mounted
Material:	Plastic Enclosure
Dimensions:	65mm x 65mm x 45mm

Please note: fixings are not supplied with this unit

Fitting detail:





Please note: As standard the hatch opens for a pre determined time with a single press of the switch. Then to close it operates for double the time to open.
If using for access then it is better to set the control panel to operate manually – it opens and closes for the amount of time the button is pressed. To adjust this open the main control panel and adjust the variable potentiometer to *Pulse Constant*
