FLOOR DUCTING

OVERVIEW

Fast and easy to install - the modular nature of our systems allows for prefabricated sections and corners to be made up.

Moveable anchor points - profile design allows the anchor lugs to be moved to any point along the length of the section, accommodating inaccuracies in pre-cast pockets and easily allowing the addition of extra lugs if required.

Cost effective - the flexibility of the system, together with its ease of installation, drastically reduces time in comparison to traditionally fabricated systems and eliminates fabrication errors and expensive mistakes on site.

STANDARD FEATURES

- Custom made to any size
- Rated up to FACTA Class E loading
- High grade aluminium
- Moveable anchor points
- Easy Installation

Material:

Prefabricated in aluminium

Cover:

Single or multi-sections accommodating tread plate or recessed as required
