

Loading Capacity: From 5 - 16 tonnes (FACTA Class B to E).

Materials: Frame made of aluminium extruded sections. Cover made of 3/5 mm aluminium chequerplate. Aluminium reinforcement to the underside. Stainless steel screws.

Features: Patent frame. The access cover is not watertight but is self-draining. Any water passing the seals will be dispersed via an integral drainage channel, which is fitted with an optional internal or external 3/4 inch flexible hose adaptor (For connection to drain by others).

Unique foldaway hinges incorporate double unbroken seals to help prevent the ingress of dirt and moisture.

A stainless steel slam action Cablock is fitted as standard to lock the lids. Locks can be opened from the inside and Tee Key operated from the outside.

Gas spring assisted lift. The lid automatically locks into the open position with a safety hold open stay to prevent against accidental closure.

Applications: For use in vehicle traffic areas in industrial buildings and areas surrounding buildings or for secondary traffic areas (pedestrian zones).

Installation: Installation must be carried out according to our instructions.

Type SEHDC can be manufactured to different FACTA testing loads.

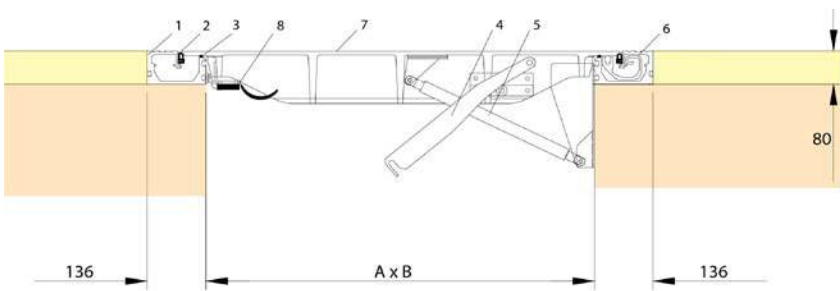

Type SEHDC used in Mecca Air Duct Access - KSA
